

**TECH is proud to
introduce another great
NEW PRODUCT!**

Finally...

A Rim Cleaner for Adhesive Weights – That Works!

A proper wheel balance using an adhesive weight begins with proper surface preparation. Pre Prep 7 is specially formulated for use with adhesive weight applications.

Pre Prep 7 removes dirt, grime, brake dust and tape weight adhesive.

Adhesive weights will not stick to a wheel surface that is not properly cleaned. This can result in weights “flying off” the wheel when the car leaves the shop and a customer comeback. Don’t waste money reapplying adhesive weights that didn’t stick the first time.

Pre Prep 7...

- Provides an excellent surface to apply adhesive weights
- Works in both warm and cold conditions
- Fast drying
- Leaves no surface residue
- No brushing or scraping required
- Economical - only a few drops are required to clean most wheels

Pre Prep 7 is SAFE to use with all types of wheel finishes

Using the wrong cleaner can result in serious damage to an expensive set of factory wheels. Many wheel finishes will not withstand the effects of harsh and corrosive chemicals and solvents.

Safe for:

- Painted Surfaces
- Aluminum
- Chrome
- Steel

Item No. TPWC
20 Oz. Bottle
